Sample description
urgency: <input type="checkbox"/> urgent (attention, 30% express surcharge)

Parameter	Method	single measurements please mark
Knock resistance, MOZ	Appendix B	<input type="checkbox"/>
Total diene content (including 1,3-butadiene)	DIN EN 27941	<input type="checkbox"/>
1,3 butadiene	DIN 51619	<input type="checkbox"/>
Propane content	DIN EN 27941	<input type="checkbox"/>
Hydrogen sulfide	DIN EN ISO 8819	<input type="checkbox"/>
Total sulfur content (after odorization)	DIN EN 17178	<input type="checkbox"/>
Corrosion effect on copper (1 h at 40 °C)	DIN EN ISO 6251	<input type="checkbox"/>
Evaporation residue	DIN EN 15470	<input type="checkbox"/>
Vapor pressure	DIN EN ISO 8973	<input type="checkbox"/>
Free water	DIN EN ISO 15469	<input type="checkbox"/>
Smell	Appendix A	<input type="checkbox"/>
Complete DIN EN 589		<input type="checkbox"/>

Sampling and transport of the gas samples:

The transport of liquid gas samples must be carried out in pressure containers specially suited for this purpose, which may only be filled to a maximum of 80 %. If you do not have your own pressure containers available, containers with 150 ml (max. 200 bar) can be borrowed from us for a rental and cleaning fee. We can arrange the transport of these empty pressure containers to the customer, whereas the transport of the filled gas cylinders to us must always be organised by the customer for legal reasons.

If you do not wish to carry out the sampling yourself, we can offer sampling according to DIN EN ISO 4257 by trained personnel, if desired also directly at a petrol station. In this case, the samples can be transported in our special vehicle in compliance with all regulations.

Since the analysis of liquid gas samples raises a number of detailed questions, from sampling to transport to measurement on the equipment, we recommend contacting us when you are planning a gas measurement. In this conversation, all important details such as sample vessels, connections, pressure ratios, duration of transport, etc. can be discussed in detail so that the incoming samples can be measured immediately.

Further desired test parameters and comments:
